EUROBOT 2018

DOCUMENTATION

by

ECAM

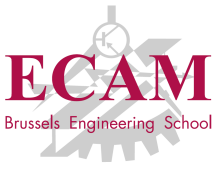
in partial fulfillment of the requirements for the degree of

Master of Industrial Engineering
in Electronics and Computer Science

at the ECAM

Project duration: October 1, 2017 – March 24, 2018

Participating students:
E. Albert
S. Barry
C. Castermans
M. Crappe
M. David
W. De Decker
P. De Keyzer
M. De Viron
S. Garo
A. Hagopian
J. Kessels
J. Nshuti
V. Puissant-Baeyens
T. Selleslagh
J. Vanneste



Contents

1 Introduction **1**
- 1.1 Eurobot . . . 1
  - 1.1.1 Rules and constraints . . . 1
- 1.2 Managment . . . 1
  - 1.2.1 Team managment . . . 1
  - 1.2.2 Code repository . . . 1
- 1.3 Conventions and style guide . . . 1
  - 1.3.1 Electronics conventions . . . 1
  - 1.3.2 Software guide lines . . . 1
- 1.4 ??? . . . 1

2 Overview **3**

3 Mechanisms **5**
- 3.1 Ball mechanism . . . 5
- 3.2 Block mechanism . . . 5
- 3.3 Bee . . . 5

4 Motion **7**
- 4.1 Mecanum wheels . . . 7
- 4.2 Motors . . . 7
- 4.3 Encoders . . . 7
- 4.4 Regulation . . . 7

5 ROS **9**

Bibliography **11**

1

Introduction

1.1. Eurobot

1.1.1. Rules and constraints

1.2. Managment

1.2.1. Team managment

1.2.2. Code repository

1.3. Conventions and style guide

1.3.1. Electronics conventions

1.3.2. Software guide lines

1.4. ???

2

Overview

3

Mechanisms

3.1. Ball mechanism
3.2. Block mechanism
3.3. Bee

4

Motion

4.1. Mecanum wheels
4.2. Motors
4.3. Encoders
4.4. Regulation

5

ROS
